EVENT INFORMATION

The continuous service record and the community rapport of the Shock and Vibration Symposium speaks for itself. With 87 Symposia under the community's belt, the 88th Symposium promises to deliver what the organization has come to pride itself on; a quality technical conference. With the conference comes over 200 technical papers, tutorials, meetings, discussion groups, and other fora presented from experts in their field.

These presentations are geared toward an audience of approximately 350-500 representatives of the US Government and the commercial sector of the shock and vibration community. These attendees range in assignment from project engineers and program developers to project managers and product developers. We also have representatives from academia and have attendance from over a dozen different countries.

- If using PowerPoint, presentations should be 20 slides or less.
- Presenters may also use a prepared video presentation, perform a demonstration, or perform an oral presentation.
- It is recommended that the briefing be approx. 7-8 minutes long with the remaining time for Q&A.
- Any questions after the 10 minute mark should be addressed with a business card or invitation to the attendee to visit the exhibit booth after the session.

HOW TO PARTICIPATE:

COMPLETE AND RETURN THE FOLLOWING FIELDS BY **AUGUST 1, 2017**:

COMPANY NAME: _____
